

**ZERO BRINE**

# **WP 6 Online Brine Platform – Application of the software for the case of the Netherlands**

**NTUA**

The ZERO BRINE project ([www.zerobriner.eu](http://www.zerobriner.eu)) has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 730390.

# Online Brine Platform (OBP)

- The Online Brine Platform (OBP) aims at promoting the secondary raw materials flow, by linking the brine owners with the end-users.
- Online Brine Platform will play a key role in replicating the paradigms generated in the framework of the ZERO BRINE project.
- Via the OBP platform, the brine streams generated from process industries, can be mapped and also possible interactions for reuse and recycling of resources between the industries across the value chain can be identified.

# Task 6.1 Development of Online Brine Platform tool (Lead Partner: NTUA)

Sub-task 6.1.1: Design and implementation of knowledge based support for user description

✓ **Completed**

- Literature review
- Knowledge model: Built by ontology engineering
- Symbiotic Brine Ontology: provides a common vocabulary and a shared understanding of the structure of information
- Ontologies are the backbone of the Online Brine Platform allowing its semantic enrichment

Sub-task 6.1.2: Design and implementation of analysis, feedback and interface tools (Lead Partner: NTUA)

**Deliverable 6.2**: Report on systems tools for analysis, feedback and interface

**Sub-task 6.1.3 , Deliverable 6.3 & 6.4**

**Semantic web  
service platform**  
(Del. 6.3)

**Semantic web  
service portal**  
(Del. 6.4)

*The platform and the portal will be linked*

# Deliverable 6.1: Wastewater and solution provider knowledge models, correlations and interlinks → **submitted**

## Contents

ABBREVIATIONS .....	i
INDEX OF TABLES .....	ii
INDEX OF FIGURES .....	iv
<b>1 INTRODUCTION .....</b>	<b>1</b>
1.1 Scope of the deliverable .....	1
1.2 The Online Brine Platform .....	1
1.2 The role of Ontologies in the Online Brine Platform .....	2
<b>2 ONTOLOGIES AND GRAPH THEORY .....</b>	<b>3</b>
2.1 What is an Ontology .....	3
2.2 Components of Ontologies .....	4
2.3 Types of Ontologies .....	4
2.4 Methodologies .....	5
2.4.1 Types of Methodologies .....	5
2.4.2 Criteria of Analysis for ontology Methodologies .....	7
2.5 Ontology development editors .....	8
2.6 Ontology Languages .....	9
2.7 Graph Theory .....	10
<b>3 DEVELOPING SYMBIOTIC BRINE ONTOLOGY (SBO) .....</b>	<b>11</b>
3.1 The purpose of ontology .....	11
3.2 Methodology .....	12
3.2.1 Determine the domain and the scope of the ontology .....	12
3.2.2 reuse of existing ontologies .....	13
3.2.3 Enumerate important terms in ontology .....	14
3.2.4 Define the classes of the symbiotic brine ontology .....	18
3.2.5 Create instances .....	20
3.2.6 Conventions .....	25
<b>4 GROUPS OF SB STAKEHOLDERS .....</b>	<b>30</b>

4.1 Introduction .....	30
4.2 Brine Generators .....	31
4.2.1 Food industry –Dairies (NACE code: C10.5) .....	31
4.2.2 Food industry - Meat process (NACE code: C10.1) .....	34
4.2.3 Food industry - Pickling vegetables (NACE code: C10.5) .....	36
4.2.4 Food industry - fish and shellfish industry (NACE code: C10.2) .....	39
4.2.5 Textile industries (NACE codes: C13.3, C13.9) .....	42
4.2.6 Water treatment (NACE code: E36.0) .....	54
4.2.7 Oil - Petroleum refinery (NACE code: C19.2) .....	64
4.2.8 Paper and Pulp Industry (NACE code: C17.1) .....	68
4.2.9 Leather industry (NACE code: C15.1) .....	73
4.2.10 Non-ferrous metal production (NACE codes: C24.0.2, C24.43, C24.4.4) .....	86
4.2.11 Iron & Steel Production (NACE codes: C24.1, C24.2, C24.5) .....	88
4.2.12 Inorganic chemical industry (NACE codes: 20.15) .....	90
4.3 Solution Providers .....	96
4.4 End-users .....	97
4.4.1 End-users of Minerals .....	97
4.4.2 Water end-users and water recovery .....	100
4.4.3 Targeted products for the SB domain .....	105

<b>6 ANNEX .....</b>	<b>116</b>

# Task 6.1 Development of Online Brine Platform tool (Lead Partner: NTUA)

Sub-task 6.1.1: Design and implementation of knowledge based support for user description

✓ **Completed**

- Literature review
- Knowledge model: Built by ontology engineering
- Symbiotic Brine Ontology: provides a common vocabulary and a shared understanding of the structure of information
- Ontologies are the backbone of the Online Brine Platform allowing its semantic enrichment

Sub-task 6.1.2: Design and implementation of analysis, feedback and interface tools (Lead Partner: NTUA)

**Deliverable 6.2: Report on systems tools for analysis, feedback and interface**

**Sub-task 6.1.3 , Deliverable 6.3 & 6.4**

**Semantic web  
service platform  
(Del. 6.3)**

**Semantic web  
service portal  
(Del. 6.4)**

*The platform and the portal will be linked*

# Task 6.1 Development of Online Brine Platform tool (Lead Partner: NTUA)

Sub-task 6.1.1: Design and implementation of knowledge based support for user description

✓ **Completed**

- Literature review
- Knowledge model: Built by ontology engineering
- Symbiotic Brine Ontology: provides a common vocabulary and a shared understanding of the structure of information
- Ontologies are the backbone of the Online Brine Platform allowing its semantic enrichment

Sub-task 6.1.2: Design and implementation of analysis, feedback and interface tools (Lead Partner: NTUA)

**Deliverable 6.2**: Report on systems tools for analysis, feedback and interface

**Sub-task 6.1.3 , Deliverable 6.3 & 6.4**

**Semantic web  
service platform**  
(Del. 6.3)

**Semantic web  
service portal**  
(Del. 6.4)

*The platform and the portal will be linked*

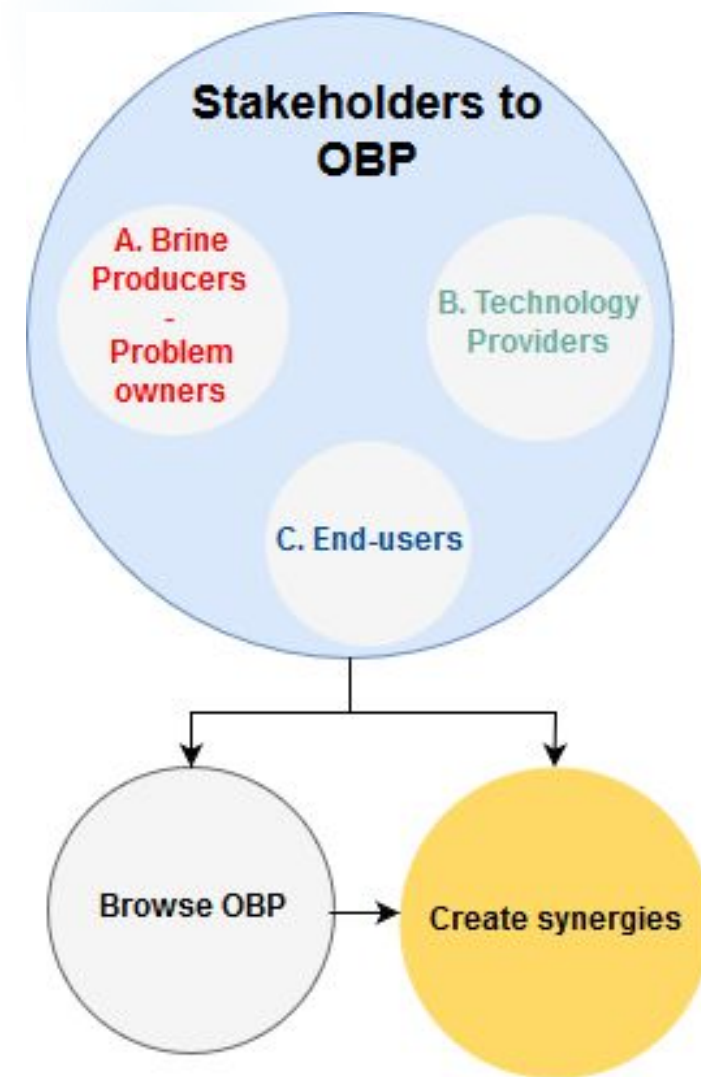

# Online Brine Platform (OBP)

*The OBP will be applied for the case of the Netherlands.*

- ✓ A network of the interested stakeholders will be created.
- ✓ Users registered to the platform will have the possibility to have access to information with respect to the available quantities of both wastewater and recovered materials, as well as, on the proximity of both suppliers and process industries to their location.
- ✓ Industries will be able to make informed decisions regarding the management of their own streams.

**Semantic web  
service platform**

# Online Brine Platform (OBP)

Users will have the possibility to navigate through useful information such as:

- ✓ Brine streams generated by process industries
- ✓ Geographic Location of Brine Owners and End-Users of recovered materials
- ✓ Uses of recovered materials
- ✓ ZERO BRINE technologies
- ✓ Successful ZERO BRINE case studies

**Semantic web  
service portal**

# Thank you for your attention
