Industrial Desalination ◆ Resource Recovery ◆ Circular Economy

# WP6 – Online Brine Platform

**Objective**  
ISPT is the leader

To develop an Online Brine Platform that will result in:

- increased customer traction for the Brine Consortium of technology suppliers

- providing effective brine treatment solutions to process industries (problem owners)

- link problem owners to end-users, promoting resource efficiency and circular economy concepts as well as facilitate and ensure the extensive knowledge exchange and dialogue between key stakeholders.

Industrial Desalination ◆ Resource Recovery ◆ Circular Economy

# WP6 – Online Brine Platform ISPT & NTUA

- **Task 6.1. Development of Online Brine Platform tool (NTUA)**
- **Task 6.2 Integration, validation and demonstration of the tools for the case of Netherlands (ISPT)**
- **5 workshops for industrial clusters in the Netherlands: Delfzijl, Amsterdam, Chemelot, Zeeland, Emmen.**

# Status WP6

- Status OBP and deliverable 6.1 is presented by Despina
- Collecting industrial data on Datastreams: Tedious (confidential) and slow (because of the Netherlands discussion), list of industries to be added (Hexxion, Emmen)
- Workshops preparation
  - Defining workshop format: serious game concept has been developed and tested, next step is graphical layout (also input for workpackage 10)

# Thank you for your attention
